DATA USAGE RESTRICTIONS

The data contained in this document are being provided for your use in determining targeted interventions associated with the HOP Program. The data is a reference tool that provides an environmental scan of geographical areas, medical conditions, and related information to be used in guiding the implementation and evaluation of this effort. Distribution and use of this data is limited solely to planning purposes associated with the HOP Program. Use of this data is not authorized for any other activity or purpose without the written permission of the University of South Carolina, Institute for Families in Society.

BY ACCESSING THE MAPS AND TABLES PROVIDED ON THE PAGES THAT FOLLOW, YOU ARE ACKNOWLEDGING AND ACCEPTING THE USAGE RESTRICTIONS DETAILED ABOVE.

For more information or to request alternate usage permission, please contact:

Dr. Ana Lòpez-De Fede

Institute for Families in Society
Division of Medicaid Policy Research

WHAT IS AN ENVIRONMENTAL SCAN?

An environmental scan is a process involving the systematic collection and analysis of information to identify and forecast local population characteristics, health needs, social determinants of health, resource availability, and other factors that may strengthen or threaten population wellbeing.

WHY USE THE HOP ENVIRONMENTAL SCAN[®]?

The goal of the HOP Environmental Scan[®] is to assist local HOP health care planning, coordination, and collaboration efforts aimed at improving access to care and better health outcomes for uninsured South Carolinians. The statewide, interactive map in this document provides a wide array of population, health care accessibility/utilization, and health care resource characteristics at both state and local ZIP Code Tabulation Area (ZCTA) levels. This map allows users to identify geographic patterns of disease burden (e.g., areas with high prevalence of diabetes among HOP participants), socioeconomic disadvantage (e.g., areas characterized by high levels of poverty), and health care resource availability (e.g., location of Federally Qualified Health Centers, Rural Health Clinics, and DAODAS facilities) in South Carolina. Additional locator maps contained in the Environmental Scan[®] allow users to locate and identify individual ZCTAs in the state. An extensive set of ZCTA- and health care facility-level data tables are also provided. The information contained in the HOP Environmental Scan[®], combined with individual HOP program data, provides a contextual framework to strengthen health care planning and service delivery for HOP participants and other low-income, uninsured residents of the state.

What are ZIP Code Tabulation Areas?

ZIP Code Tabulation Areas (ZCTAs) are approximate area representations of U.S. Postal Service (USPS) five-digit ZIP Code service areas used by the Census Bureau to present statistical data from censuses and surveys (See Metadata for additional details).

WHAT'S NEW IN THE HOP ENVIRONMENTAL SCAN VERSION 2.0[®]?

The Healthy Outcomes Plan (HOP) Environmental Scan 2.0[®] supports local HOP planning, resource allocation, partnering, evaluation, and other decision-making processes with the inclusion of these new interactive map layers and tabled data:

- Number of HOP Participants by ZIP Code Tabulation Area
- Ratio of HOP Participants to Uninsured, Non-Elderly Adults <138% FPL by ZIP Code Tabulation Area
- Prevalence of Chronic Conditions (Asthma, Diabetes, and Hypertension) Among HOP Participants by ZIP Code Tabulation Area
- Prevalence of Behavioral Health Conditions Among HOP Participants by ZIP Code Tabulation Area
- SC Department of Alcohol and Other Drug Abuse Services (DAODAS) Facilities
- SC Department of Mental Health (DMH) Facilities
- ZIP Code Tabulation Area Locators

Statewide Summary Button

Clicking this icon on the interactive map will take you to a summary table of total counts and percentages/rates for South Carolina as a whole and for urban, suburban, and rural areas of the state.

IMPORTANT USAGE INFORMATION

See the HOP Environmental Scan Version 2.0[®] User Guide for detailed usage instructions.

The interactive map may take several seconds to load.

For full functionality, this document is best viewed on a Windows or Macintosh desktop or laptop computer.

To make greatest use of the Environmental Scan[®], users are encouraged to review all tables and metadata.

CAVEATS

Data contained in this document are provided solely to facilitate local HOP planning and programming efforts.

Reported data values based on small population numbers should be interpreted with caution.

In the statewide map, prevalence values calculated for areas with a population of 10 or fewer are geographically highlighted with a hatched overlay as an indicator of caution.

Data elements in the ZCTA table have been suppressed to protect confidentiality in ZCTAs with fewer than 10 people.

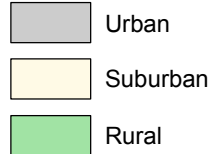

KEY STATEWIDE FINDINGS

- Of 13,429 South Carolina HOP participants, 53% reside in urban areas, 23% in suburban areas, and 24% in rural areas. These percentages are comparable to the proportion of all uninsured adults ages 18 to 64 below 138% of the federal poverty level in urban areas (50%), suburban areas (23%), and rural areas (27%);
- 8% of HOP participants have asthma, 28% have diabetes, and 55% have hypertension;
- 67% of HOP participants have a behavioral health condition;
- 50% of HOP participants scored 3 or higher on the Global Appraisal of Individual Need (GAIN) assessment (a score of 3 or higher indicates a behavioral health need);
- 9% of HOP participants scored 10 or higher on the Global Appraisal of Individual Need assessment;
- The odds of a behavioral health condition among HOP participants with a GAIN score of 10 or higher is nearly four times that of those with a GAIN score less than 10 (Odds Ratio = 3.8);
- The odds of a behavioral health condition AND at least one selected physical condition (asthma, diabetes, and hypertension) among HOP participants with a GAIN score of 3 or higher is almost twice that of those with a GAIN score less than 3 (Odds Ratio = 1.9).

Geographic Boundaries

Data Element	Source	Notes & Definitions
South Carolina Counties	US Census Bureau, Census 2010.	
South Carolina ZIP Code Tabulation Areas (ZCTAs)	US Census Bureau, Census 2010.	ZIP Code Tabulation Areas (ZCTAs) are approximate area representations of U.S. Postal Service (USPS) five-digit ZIP Code service areas that the Census Bureau creates using whole blocks to present statistical data from censuses and surveys. The Census Bureau defines ZCTAs by allocating each block that contains addresses to a single ZCTA, usually to the ZCTA that reflects the most frequently occurring ZIP Code for the addresses within that tabulation block. Blocks that do not contain addresses but are completely surrounded by a single ZCTA (enclaves) are assigned to the surrounding ZCTA; those surrounded by multiple ZCTAs will be added to a single ZCTA based on limited buffering performed between multiple ZCTAs. The Census Bureau identifies five-digit ZCTAs using a five-character numeric code that represents the most frequently occurring USPS ZIP Code within that ZCTA. Multiple ZIP Codes may be associated with a single ZCTA. For example, South Carolina ZIP Codes 29401 and 29402 both are included in ZCTA 29401. The USPS associates a place name with each ZCTA (identified in the ZIP Code Tabulation Area Information Table and Locator Table).
South Carolina Regions	SC IFS/MPR, 2015.	Regions are specified only to aid in the location and identification of individual ZIP Code Tabulation Areas.

Facilities and Providers

Data Element	Source	Notes & Definitions
Healthy Outcome Plan (HOP) Hospitals	SC Department of Health and Environmental Control, November 2015.	Hospitals that are participating HOP partners.
Federally Qualified Health Centers (FQHCs)	US Health Resources and Services Administration, December 2015.	
Free Medical Clinics	SC Free Clinics Association, December 2015.	
Rural Health Clinics (RHCs)	US Centers for Medicare and Medicaid Services, October 2015.	
South Carolina Department of Alcohol and Other Drug Abuse Services (DAODAS) Facilities	SC DAODAS, November 2015.	
South Carolina Department of Mental Health (DMH) Facilities	SC DMH, November 2015.	
Licensed Independent Practitioners (LIPs) Providers	SC MMIS Directory of Enrolled LIPs, January 2014	Includes Licensed Psychologists, Licensed Professional Counselors, Licensed Marriage and Family Therapists, and Licensed Independent Social Workers.

High Socio-Economic Need Indicators

Data Element	Source	Notes & Definitions
Palmetto SADI©	USC IFS MPR, 2013.	The Palmetto Small Area Deprivation Index (SADI) is a census-based composite measure of socioeconomic disadvantage optimized to predict chronic disease burden among South Carolina Medicaid recipients. High socioeconomic deprivation areas are defined as the top quartile of ZCTA-level Palmetto SADI deprivation index scores.
Educational Attainment	US Census Bureau, ACS 2014 5-Year Estimates.	Percent of civilian, noninstitutionalized adults ages 25 to 64 with no high school diploma (includes equivalency). High need ZCTAs are defined as the highest quartile of the ZCTA-level % with no high school distribution.
Poverty	US Census Bureau, ACS 2014 5-Year Estimates.	Percent of adults ages 18 to 64 for whom poverty status is determined that live below the federal poverty level. High need ZCTAs are defined as the highest quartile of the ZCTA-level % below poverty distribution.
Unemployment	US Census Bureau, ACS 2014 5-Year Estimates.	Percent of adults ages 20 to 64 in the labor force who are unemployed. High need ZCTAs are defined as the highest quartile of the ZCTA-level % unemployed distribution.
Vehicle Availability	US Census Bureau, ACS 2014 5-Year Estimates.	Percent of households with householder <65 years of age with no vehicle available. High need ZCTAs are defined as the highest quartile of the ZCTA-level % with no vehicle distribution.

Healthy Outcome Plan (HOP) Participants

Data Element	Source	Notes & Definitions
Total Healthy Outcome Plan (HOP) Participants	SC Revenue and Fiscal Affairs Office, November 2015.	HOP participants enrolled and active in the past six months as of November 2015 geographically located in South Carolina.
Ratio of HOP Participants to Uninsured Adults Ages 18 to 64 below 138% of the Federal Poverty Level	SC Revenue and Fiscal Affairs Office, November 2015.; US Census Bureau, ACS 2014 5-Year Estimates..	

Metadata

Healthy Outcome Plan (HOP) Participant Disease Prevalence

Data Element	Source	Notes & Definitions
Asthma Prevalence per 1,000 HOP Participants	SC Revenue and Fiscal Affairs Office, November 2015.	Class range values: Low(0 - 40.5), Mid-Low (40.6 - 76.7), Mid-High (76.8 - 285.7), High (> 285.7). The values in the Mid-High and High Class ranges are all above the statewide average for this measure.
Diabetes Prevalence per 1,000 HOP Participants	SC Revenue and Fiscal Affairs Office, November 2015.	Class range values: Low (0 - 111.1), Mid-Low (111.2 - 278.4), Mid-High (278.5 - 583.3), High (> 583.3). The values in the Mid-High and High Class ranges are all above the statewide average for this measure.
Hypertension Prevalence per 1,000 HOP Participants	SC Revenue and Fiscal Affairs Office, November 2015.	Class range values: Low(0 - 166.7), Mid-Low (166.8 - 554.5), Mid-High (554.6 - 777.8), High (> 777.8). The values in the Mid-High and High Class ranges are all above the statewide average for this measure.
Physical Condition Prevalence per 1,000 HOP Participants	SC Revenue and Fiscal Affairs Office, November 2015.	Prevalence of one or more selected physical conditions (asthma, diabetes, and hypertension) per 1,000 HOP participants. Class range values: Low(0 - 250.0), Mid-Low (250.1 - 628.0), Mid-High (628.1 - 800.0), High (> 800.0). The values in the Mid-High and High Class ranges are all above the statewide average for this measure.
Behavioral Condition Prevalence per 1,000 HOP Participants	SC Revenue and Fiscal Affairs Office, November 2015.	Class range values: Low(0 - 200.0), Mid-Low (200.1 - 672.3), Mid-High (672.4 - 794.9), High (> 794.9). The values in the Mid-High and High Class ranges are all above the statewide average for this measure.
Prevalence of Global Appraisal of Individual Needs (GAIN) Score of 3 or Higher per 1,000 HOP Participants	SC Healthy Outcomes Plans, December 2015.	If any of the multiple GAIN assessments for a HOP participant had a total score of 3 or higher, the HOP participant was classified as having a GAIN score of 3 or higher. Only GAIN scores for the current HOP participants geographically located in South Carolina were used in the analyses for this Environmental Scan. Prevalence of GAIN scores were calculated only among those HOP participants who had a GAIN score. Class range values: Low (0 - 181.8), Mid-Low (181.9 - 503.2), Mid-High (503.3 - 717.2), High (> 717.2). The values in the Mid-High and High Class ranges are all above the statewide average for this measure.

Uninsured

Data Element	Source	Notes & Definitions
Number of Inpatient Hospitalization Discharges per 1,000 Uninsured	SC Revenue and Fiscal Affairs Office, November 2015; US Census Bureau, ACS 2014 5-Year Estimates.	This data set contains SC Inpatient (IP) and Emergency Department (ED) patients ages 18-64 where the expected pay source is self pay/indigent (proxy for uninsured) for July 2012 – June 2015. The 3 year dataset received had patient count values less than 10 withheld to meet the SC Revenue and Fiscal Affairs Office data release guidelines. However, discharge counts were reported for values less than 10. To maintain confidentiality, retain patient to discharge ratio magnitude, and still provide rates; we made the following adjustments: where the total patient population was missing and a discharge count existed, the total patient population was set to 10; where the IP or ED counts were 1-5, the value was set to 5; where the IP or ED counts were 6-10, the value was set to 10. Class range values: Low (0 – 50), Medium (51 – 80), High (81 – 563).
Number of Emergency Department (ED) Discharges per 1,000 Uninsured	SC Revenue and Fiscal Affairs Office, November 2015; US Census Bureau, ACS 2014 5-Year Estimates.	This data set contains SC Inpatient (IP) and Emergency Department (ED) patients ages 18-64 where the expected pay source is self pay/indigent (proxy for uninsured) for July 2012 – June 2015. The 3 year dataset received had patient count values less than 10 withheld to meet the SC Revenue and Fiscal Affairs Office data release guidelines. However, discharge counts were reported for values less than 10. To maintain confidentiality, retain patient to discharge ratio magnitude, and still provide rates; we made the following adjustments: where the total patient population was missing and a discharge count existed, the total patient population was set to 10; where the IP or ED counts were 1-5, the value was set to 5; where the IP or ED counts were 6-10, the value was set to 10. Class range values: Low (0 – 600), Medium (601 – 1,100), High (1,101 – 2,341).
Number of Uninsured ED patients with 2 or more ED Discharges per 1,000 Uninsured	SC Revenue and Fiscal Affairs Office, November 2015; US Census Bureau, ACS 2014 5-Year Estimates.	This data set contains SC Inpatient (IP) and Emergency Department (ED) patients ages 18-64 where the expected pay source is self pay/indigent (proxy for uninsured) for July 2012 – June 2015. The 3 year dataset received had patient count values less than 10 withheld to meet the SC Revenue and Fiscal Affairs Office data release guidelines. However, discharge counts were reported for values less than 10. To maintain confidentiality, retain patient to discharge ratio magnitude, and still provide rates; we made the following adjustments: where the total patient population was missing and a discharge count existed, the total patient population was set to 10; where the IP or ED counts were 1-5, the value was set to 5; where the IP or ED counts were 6-10, the value was set to 10. Class range values: Low (0 – 120), Medium (121 – 220), High (221 - 455).

Miscellaneous

Data Element	Source	Notes & Definitions
Urban/Suburban/Rural Class	USC IFS MPR, 2015; US Census Bureau, Census 2010.	ZCTA-level urban/rural class breaks were established to 1) maximize spatial correlation with a county-level urban/rural classification system based on Metropolitan/Micropolitan Statistical Area definitions, and 2) highlight urban/suburban/rural variation within counties. Classifications are based on the percentage of the ZCTA's population that is Urban as per the Census 2010. Urban Areas are those ZCTAs with an urban population comprising more than 72.5% of the total population. Suburban Areas are those ZCTAs with an Urban population comprising between 72.5 and 43.0% of the total population. Rural Areas are those ZCTAs with an urban population comprising less than 43.0% of the total population.
